

Press Release

Technoforum 2015

International Specialized Exhibition for Equipment and Technology for Processing of Construction Materials

From October 19 to 22 Pavilion No.1 of Expocentre Fairgrounds will host International Specialized Exhibition for Equipment and Technology for Processing of Construction Materials **Technoforum 2015**.

The project is carried out by Expocentre and Stankoinstrument Russian Association of Machine-Tool Manufacturers. The trade show is supported by the Russian Ministry of Industry and Trade and the Department of Science, Industrial Policy and Entrepreneurship of the city of Moscow. It runs under the auspices of the Russian Chamber of Commerce and Industry.

The Technoforum 2015 key section is devoted to **advanced technologies and technological units of the machine tool industry aimed at upgrading of the Russian defence enterprises**.

The exhibitors will present integrated systems of science-driven high-performance production machinery for retooling of production facilities of basic processing industries; machine tool systems and forming equipment for processing of metals, wood, stones, composite and polymer materials; precision production machinery based on nanotechnologies; assembly parts and components, spare parts.

The industry experts will be offered high-performance cutting and auxiliary instruments for machine tool systems; testing technology and metrology; diagnostic systems and test benches; energy saving technological systems and equipment for materials processing, and many others.

About 100 companies from *Belarus, Germany, Russia, Spain, Taiwan, Ukraine, and the USA* will showcase their products at Technoforum 2015.

Exhibitors of the Belarusian national pavilion will put on display new developments of the largest Belarusian companies, among them MZOR, Machine-Tool Plant "Krasny Borets", Baranovichi Plant of Machine Appliances, StankoGomel, Vizas Works, and others. The Belarusian national pavilion is organized by Institute Belorgstankinprom.

Among foreign participants there are HIWIN Technologies Co. (Taiwan); Knuth (Germany), ZCC (Germany); Haas (USA), Bost (Spain), and others.

At the trade show Russia will be presented by 70 companies and enterprises, among them STANKIN Moscow State University of Technology, Abamet Managing Company, KR Prom, Baltiyskaya Promishlennaya Kompaniya, NPP Sigas, Irlen Engineering, Machine Tool Trade Association "KAMI", Rosneft Lubricants, Barus, DEG, Balt-System, Delta-Test Scientific Industrial Corporation,

Invent, Iscar, CoSPA, Pumori Urals Machine Building Corporation, Saturn Instrumentalny Zavod, Transet, ElionMost, and others.

One of the partners of the Technoforum 2015 exhibition is **STANKIN** Moscow State University of Technology. The exposition participants will demonstrate sophisticated products and R&D achievements made by university employees in the field of metrological systems, 3D programming, production automation, NC systems, digital production for different industries, and the latest programs of supplementary vocational education developed in cooperation with Russia's major machine builders.

The exhibition will feature the section devoted to **Science. Vocational Education. Production**. Participants in this section are leading technical universities and colleges, e.g. Pavlov Polytechnic College No.8 (Moscow), Ogarev Mordovia State University (Saransk), Blagonravov Institute for Machine Science of the Russian Academy of Sciences (Moscow), and Moscow Aviation Institute (Moscow).

Business Contacts Exchange will be open for those who search for prospective partners or would like to establish new business contacts.

The key event of the exhibition program is **Scientific and Technical Conference on Advanced Technologies and Developments of High-Tech Science-Driven Equipment of Machine-Tool Industry Enterprises, Complying with the Tasks of Implementation of the Federal Target Program for Development of the Defence Industry of Russia for 2011-2020**. The event is organized by the Stankoinstrument Association with the assistance of Expocentre.

Participants in the conference will be President of the Stankoinstrument Association **Georgy Samodurov** and Rector of STANKIN Moscow State University of Technology **Sergey Grigoriev**. Heads of the tool making industry, engineering companies, and research institutes will make their speeches as well.

The exhibition will feature the **8th International Scientific and Technical Conference on Machinery Manufacturing: Traditions and Innovations 2015**. It is organized by STANKIN Moscow State University of Technology and assisted by Expocentre. The industry experts will present the latest innovative developments, hold round table discussions, and make speeches at the conference. The event will be a good platform to exchange the best practices between the Russian and foreign companies, researchers, and industry experts.

The exhibition accompanying program features

- legal seminar on Legal Issues Concerning Development of Real Economy in Russia,
- research and practice seminar on Special Aspects of Choosing and Using Lubricants and Coolants,
- panel meeting on Component Parts.
