

**18–21.10.2021**

**Within Research-Technology-Innovations Expo Project  
International Exhibition**

# **TECHNOFORUM**

**MINPROMTORG  
RUSSIA**

Organised by

**EXPOCENTRE**

**EXPOCENTRE Fairgrounds, Moscow, Russia**

**[www.technoforum-expo.ru](http://www.technoforum-expo.ru)**

**Equipment and Technology  
for Materials Processing**

**Supported by**

State Duma of the Russian Federal Assembly

**Under auspices of**

Russian Chamber of Commerce and Industry

# TECHNOFORUM IS

- a demonstration of production processes from cutting-edge research in various industry sectors to pilot and series production of finished products;
- an open platform for research discussions, creative experiments, educational projects and intellectual endeavours;
- a centre for the popularisation of science for schoolchildren, students and young professionals.

Organised by

Supported by

Under auspices of

**4,245** visitors

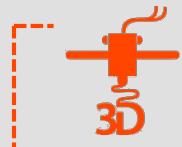

from **55** countries

**103** exhibitors

from **10** countries

**2,938** sq m  
of exhibition space

# PRODUCT SECTORS

Additive manufacturing.  
3D printing

Welding and related  
technologies

Robotics and industrial  
automation

Heat treatment

Industrial ecology

Integrated systems of science-driven high-performance  
production machinery for retooling of production facilities  
of basic processing industries

Metal structures, sheet metal  
working, coated sheets

Retrofitting

Machine tool systems and forming equipment for  
processing of metal, wood, stones, composite materials,  
polymer materials, etc.

Equipment and technology  
for production and installation  
of metal structures

Professional education, information  
materials, research and technical  
literature

# FEEDBACK

## **Denis Manturov, Minister of Industry and Trade of the Russian Federation:**

"I am sure that the implementation of such a large-scale exhibition and convention project is very timely in the light of the challenges currently facing the Russian machine-building industry. This applies both to import substitution and export increase . At present, Russian companies need not only to master the substitution production of end products, but also to work towards creating and improving the component base and completing parts".

## **Vladimir Kononov, NTI Expo Organising Committee Chairman, Deputy of the Russian State Duma:**

"Technoforum grew after its inclusion in NTI Expo (Research-Technology-Innovations Expo). It covers new technologies, artificial intelligence, cyber security, software development systems, etc.

The exhibition is accompanied by supporting events which address industries' transformation into the digital economy. The focus is on import substitution".

## **Sergey Katyrin, President of the Russian Chamber of Commerce and Industry:**

"The Technoforum 2020 exhibition, which is part of Russian Industry Week multi-sectoral project uniting key industrial exhibitions at EXPOCENTRE Fairgrounds, will allow to assess the status and prospects of development of modern industrial technologies and will facilitate the entry of advanced scientific developments to the Russian market. I am confident that the exhibition's conference programme will provide a venue for constructive discussions on topical issues in the development of global and Russian machine-building".
